PROJECTS.

The principal projects conducted by the Weather Bureau during the fiscal year ended June 30, 1909, were as follows, with approximate cost in each case. The cost of these projects has also been charged in each case against the group to which it pertains.

The general work of the Weather Bureau, outside of Washington, was carried on under the authority contained in two appropriations, viz, "Salaries, Weather Bureau," from which all commissioned and temporary employees were paid, and "General expenses, Weather Bureau," from which all other expenses were paid. The commissioned employees were located at 206 stations, the majority of which served as centers for the prosecution of forecast, climatological, crop, river and flood work, etc., in the surrounding sections. The official in charge and the employees under him were engaged in the performance of the various lines of work that were carried on at each station. This work has been divided into projects, which are hereafter described. As an illustration: The official in charge of the station at New Orleans is in charge of the climatological work of the State of Louisiana, the forecasting of stages for the rivers within the State, the taking and recording of observations, the issuing of daily weather and temperature forecasts, the making of frost and cold-wave forecasts for several States, the dissemination of storm and hurricane warnings, the collection and dissemination of special meteorological crop observations, ocean meteorological observations, the printing and issuing of weather maps, bulletins, forecast cards, etc. All of this work is done by the official in charge and his corps of assistants, much of it being done simultaneously, the total time devoted to any one project varying from day to day according to existing weather conditions. The whole work is done in the same office, using the same furniture, stationery, and having a common expense for fuel, gas, electricity, etc. The work is so coordinated as to accomplish the greatest amount with the least expense, but the impracticability of determining an accurate cost of rent, gas, electricity, fuel, stationery, furniture, and other miscellaneous expenses and the exact salary cost for each line of work is evident. The condition at New Orleans is typical of other stations. Therefore the cost indicated for each project has been approximated, but it is reasonably correct.

NO. 1. ADMINISTRATION.

Willis L. Moore, Chief of Bureau, in Washington.

Cost.

Salaries in Washington.....	\$105,652.73
Traveling and field expenses.....	1,307.67
Fuel, lights, repairs, supplies, etc.....	19,740.88
Total.....	126,701.28

No. 2. THE MONTHLY WEATHER REVIEW.

Cleveland Abbe, professor of meteorology (Washington and Baltimore), editor.

A summary of the weather of the month and the year, showing average temperature and other climatological data for about 3,600 land stations in the United States. The aim is to present the meteorological conditions for each month, so that the weather of any part of the United States can be easily compared with that of any other, or with any portion of the world.

Cost.

Salaries.....	\$10, 693. 96
Traveling and field expenses.....	102. 24
Paper, etc.....	2, 395. 00
Total.....	13, 191. 20

No. 3. FORECAST WORK.

Edward B. Garriott, professor of meteorology (Washington), in charge.

(a) *Weather and temperature forecasts.*—Made twice daily for all States; based upon observations of meteorological conditions made at about 230 stations in the United States, the West Indies, Hawaiian Islands, Alaska, the Azores, Iceland, Canada, and a few points in Europe and Asia.

(b) *Storm warnings.*—Warnings of storms likely to imperil shipping; distributed by telegraph, telephone, and other expeditious means to all ports on the Atlantic, Pacific, and Gulf seacoasts, and Great Lakes that are within the threatened zone.

(c) *Cold waves.*—Advices of coming cold waves given in threatened districts twelve to thirty-six hours in advance by means of telegraph, telephone, mail, flag signals, etc.

(d) *Frost warnings.*—Issued during crop-growing seasons in the interest of fruit, truck, tobacco, and other growers.

(e) *Hurricane warnings.*—Special advices to threatened districts on Atlantic and Gulf coasts of approach of West Indian hurricanes.

(f) *Heavy-snow warnings.*—For the benefit of transportation lines, both in and out of cities.

(g) The daily distribution of forecasts and meteorological information by maps, bulletins, forecast cards, etc.

No. 4. RIVER AND FLOOD SERVICE.

Harry A. Frankenfield, professor of meteorology (Washington), in charge.

For the staging of rivers and the issuing of daily forecasts of water stages and of flood warnings in the interest of commerce and navigation, and for the saving of life and property.

Cost.

Salaries.....	\$60, 577. 14
Traveling and field expenses.....	1, 221. 43
Miscellaneous supplies and expenses.....	20, 832. 07
Total.....	82, 630. 64

No. 5. CRANBERRY MARSH INVESTIGATIONS.

Henry J. Cox, professor of meteorology (Chicago), in charge.

Conducted in the marshes of Wisconsin for the purpose of improving frost warnings for benefit of this industry, which is peculiarly subject to damage by frost.

Cost.

Salaries.....	\$365. 77
Miscellaneous supplies and expenses.....	250. 00
Total.....	615. 77

NO. 6. CLIMATOLOGICAL AND CROP WORK.

Frank H. Bigelow, professor of meteorology (Washington), in charge.

(a) *Climatological work*.—Establishing the climatology of the United States by means of meteorological observations taken at regular stations and by about 3,600 cooperative observers located in each county of the United States. The data for each State is collected monthly at a regular station designated as the state center and published in quarto size.

(b) *Meteorological crop reports*.—Special observations of weather, precipitation, and temperature taken at about 290 places in the great cereal and cotton belts and telegraphed daily to district centers, where they are issued in bulletin form for the benefit of the corn, cotton, sugar, rice, and wheat interests. Weekly bulletins, giving the summary of weather conditions for the preceding week that have had marked bearing on crops, are printed and issued from each state center.

Cost.

Salaries.....	\$108,835.30
Traveling and field expenses.....	3,664.28
Miscellaneous supplies and expenses.....	62,496.22
Total.....	174,995.80

NO. 7. MARINE METEOROLOGY.

Henry L. Heiskell, chief of division (Washington), in charge.

(a) *Marine meteorological work*.—The collection of meteorological and physical information pertaining to the oceans, for vessels of war, of commerce, etc.; plotting the data on daily synoptic charts, etc., and the preparation of data for use in the monthly pilot charts of the Atlantic and Pacific oceans issued by the Hydrographic Office.

(b) *Vessels reporting*.—The arrival and departure of passing vessels for the benefit of commerce and navigation at certain stations located on the Atlantic, Gulf, and Pacific coasts.

Cost.

Salaries.....	\$30,180.00
Traveling and field expenses.....	150.00
Miscellaneous supplies and expenses.....	1,023.67
Total.....	31,353.67

NO. 8. RESEARCH OBSERVATORY.

Alfred J. Henry, professor of meteorology (Mount Weather, Va.), in charge.

For conducting meteorological observations for the improvement of weather forecasts, warnings, etc.

(a) Meteorological observation station work.

(b) Studies of the atmosphere at the surface of the earth and at various altitudes; determinations of its temperature, moisture content, pressure, state of electrification, direction and magnitude of its movements; its cloudiness, dust content, absorption of light, of heat, and of electric waves, and its various other properties.

(c) Solar investigations, involving a careful measurement of the insolation, or amount of solar energy reaching the earth in a unit of time; the size and distribution of sun spots, faculae, and prominences, and an especial effort to detect all changes in the registered amounts of the solar energy, and a careful effort to refer these changes to their real causes, whether of terrestrial or of solar origin.

(d) *Terrestrial magnetism*.—A study of the regular and of the irregular changes in the magnitude and direction of the earth's magnetic force, in connection with other terrestrial phenomena and with solar activities of all kinds.

(e) *Laboratory investigations*.—The reproduction under controllable conditions of various meteorological phenomena, and experiments that may aid in explaining the origin and laws of weather conditions; also the construction and standardizing of certain apparatus.

No. 14. EVAPORATION.

Frank H. Bigelow, professor of meteorology (Washington), in charge.

The overflow of the Colorado River through the irrigation ditches in the Imperial Valley filled the old Salton Basin, 285 feet below sea level, to the depth of 80 feet. The Salton Sea now presents a surface of several hundred square miles and affords an exceptional opportunity for evaporation investigations. These investigations will determine the rate at which valuable subjugated lands will be recovered and solve many problems that are of vital importance to engineers engaged in irrigation, waterways, and reclamation work. Evaporation and rainfall are correlative factors in the supplying of water for waterways, reservoirs, and farming generally, but meteorologists have heretofore been limited to the collection of precipitation data only and there is a lack of knowledge regarding the losses by evaporation. It is a gap in practical science greatly needing to be filled.

PROJECTS.

The principal projects conducted by the Bureau of Animal Industry during the fiscal year ended June 30, 1909, were as follows, with approximate cost in each case. The cost of these projects has also been charged in each case against the group to which it pertains.

MEAT INSPECTION.

This work was carried on at 876 establishments located in 240 cities and towns. It covers the ante-mortem inspection of animals to be slaughtered and the post-mortem inspection of their carcasses, the reinspection of meats and meat food products prepared therefrom, the supervision of processes of preparation of meats and meat food products, and the branding or other marking of wholesome carcasses, parts, and meat food products prepared for interstate or export trade, and the issuance of certificates to accompany export products; also the condemnation and disposition of carcasses, parts of carcasses, and meat food products that are found to be unwholesome and unfit for human food. The cost of this work for the year was \$2,772,864.77 for salaries, \$40,547.80 for traveling expenses, and \$75,232.50 for supplies and miscellaneous items—a total of \$2,888,645.07.

ERADICATION OF SCABIES IN SHEEP AND CATTLE.

This work was carried on principally in the range States and Territories and at feeding stations and stock yards. It involves the inspection and dipping of large numbers of cattle and sheep, the issuance of certificates, and the supervision of transportation and cleaning of cars. The cost was \$310,383.42 for salaries, \$156,373.57 for traveling expenses, and \$10,810.57 for supplies and miscellaneous items—a total of \$477,567.56.

ERADICATION OF CATTLE TICKS.

This work, done in cooperation with State and Territorial authorities, was inaugurated and conducted in 13 States. It is carried on mainly in areas contiguous to the Texas fever quarantine line, and includes the inspection of cattle, the location of infected animals and premises, their reinspection, and their treatment, or supervision or direction of same, with a view to freeing such areas of Texas-fever ticks, in order that the quarantine may be removed therefrom. The cost was \$175,604.49 for salaries, \$47,685.80 for traveling expenses, and \$5,067.93 for supplies and miscellaneous items—a total of \$228,358.22.

ERADICATION OF FOOT-AND-MOUTH DISEASE.

An outbreak of foot-and-mouth disease was discovered in November, 1908, in the States of Pennsylvania, New York, Michigan, and Maryland, and was eradicated in cooperation with state authorities. The method was to enforce a strict quarantine, to discover all infected animals and localities, and to slaughter and bury all diseased and exposed animals and disinfect the premises occupied by them. The owners of condemned animals were reimbursed to the extent of the appraised value and were also paid for property destroyed or damaged in disinfection, the department paying two-thirds and the State one-third. The federal quarantine began November 13, 1908, and was removed April 24, 1909. The number of animals slaughtered was 3,636. The cost of this work to the department was \$111,976.85 for salaries, \$77,805.95 for traveling expenses, and \$109,462.21 for miscellaneous items and supplies—a total of \$299,245.01.

SPECIAL INVESTIGATIONS.

This work consists in the investigation of reported outbreaks of disease in the different States, the tuberculin testing of cattle and mallein testing of horses, and has for its purpose the repression of animal diseases by cooperation with the state authorities. The cost of this work was \$4,923 for salaries, \$4,420.50 for traveling expenses, and \$70 for miscellaneous expenses—a total of \$9,413.50.

INSPECTION OF SOUTHERN CATTLE.

This work covers the enforcement of the quarantine against the area infested with ticks which convey the disease generally known as "Texas or southern fever," the supervision of the movement of cattle therefrom and their transportation and handling in stock yards, and cleaning of cars in accordance with the regulations. The cost was \$37,930.75 for salaries, \$7,719.93 for traveling expenses, and \$776.02 for miscellaneous items—a total of \$46,426.70.

SCIENTIFIC INVESTIGATIONS RELATING TO ANIMAL DISEASES.

This work is carried on for the purpose of studying the causes of diseases affecting animals and of ascertaining the methods best adapted for controlling and curing them. It includes investigations and experiments along various lines, the preparation and distribution of blackleg vaccine, tuberculin, and mallein, and requires the maintenance of laboratories, an experiment station, and a library. The cost was \$69,759.83 for salaries, \$5,544.59 for traveling expenses, and \$54,874.27 for supplies and miscellaneous expenses—a total of \$130,178.69.

INVESTIGATIONS IN ANIMAL HUSBANDRY AND EXPERIMENTS IN BREEDING AND FEEDING.

This work includes experiments in animal breeding and feeding in cooperation with state experiment stations, the collection of information relating to the breeding and feeding of farm animals, and the supervision of pedigree-record associations. The cost was \$34,031.65 for salaries, \$7,556.05 for traveling expenses, and \$27,434.59 for miscellaneous expenses—a total of \$69,022.29.

DAIRY INVESTIGATIONS AND INSPECTION OF DAIRY PRODUCTS.

This work covers general investigations in dairy subjects; special lines of work relating to dairy organizations, laws, and development of foreign markets; investigations in the manufacture of dairy products; inspection of dairy exports and of factories and markets for renovated butter. The cost was \$79,065.80 for salaries, \$34,349.05 for traveling expenses, and \$13,495.37 for miscellaneous items—a total of \$126,910.22.

INSPECTION OF ANIMALS FOR EXPORT AND IMPORT.

This work is carried on at the more important stock yards, ports on the Atlantic and Pacific seaboards, the Canadian and Mexican borders, and consists in the careful inspection of all animals. An inspection is also made of the vessels carrying such animals to see that they are properly fitted and equipped as prescribed by the department regulations. The cost of this work was \$28,938.48 for salaries, \$5,780.75 for traveling expenses, and \$10,221.27 for supplies and miscellaneous items—a total of \$44,940.50.

GENERAL SUPERVISION AND MISCELLANEOUS WORK.

The general administrative work of the bureau cost \$42,587.02 for salaries, \$2,156.01 for traveling expenses, and \$19,790.38 for miscellaneous items—a total of \$64,533.41.

Authority: (Digest of Appropriations, pp. 443-444): * * * "to study plant physiology in relation to crop production; to originate and improve crops by breeding and selection; * * * to investigate the practical application in agriculture of the

fixation of atmospheric nitrogen by bacteria and other micro-organisms in soils and the root tubercles of leguminous and other plants; * * * to propagate, test, and experiment with rare new seeds, bulbs, trees, shrubs, vines, cuttings, and plants; for the employment of investigators, local and special agents, agricultural explorers, experts, clerks, illustrators, assistants, student and scientific aids, * * * and all other labor and scientific assistance required in conducting investigations and experiments in the city of Washington and elsewhere. * * * For actual and necessary traveling expenses, * * * miscellaneous expenses, and "for all other necessary expenses * * *."

(B) *Plant-life history investigations.*

Outline of work:

(1) Establishment of date culture and study of the life history of the date palm; to bring about the establishment of date culture on a commercial scale in the United States; particularly to investigate the life history of the date palm in reference to the different varieties and methods of culture best adapted to American conditions.....	\$3, 724. 73
(2) Clover and alfalfa investigations—seed production and change of seed; to investigate the life history of clover and alfalfa, with special reference to climatic, soil, and culture conditions, requirements of the various varieties, and at the same time to determine whether change of seed is beneficial, and, if so, whether it can be carried out to advantage in practice.....	4, 457. 73
(3) Establishment of pistache culture, and study of the life history of the pistache and its wild relatives.....	1, 010. 18
(4) Caprification of the fig and study of the life history of figs and caprifigs; to continue the investigation of the process of caprification and to study in detail the life history of figs used for drying, and the caprifigs in which the fig insect is produced....	2, 317. 83
(5) Arboricultural investigations, with special reference to the utilization of tree crops in dry-land regions, and to investigate the life history of fruit, nut, and forage trees likely to succeed in the drier parts of the southwest.....	4, 342. 65
(6) Breeding hardy frost-proof oranges which may be grown in more northern regions than the present orange belt and be able to resist severe freezes; breeding new types of citrus fruits to obtain hybrids combining the loose skin of the tangerine with the quality and form of the ordinary orange, and to secure improved varieties of tangerines, oranges, pomeloes, lemons, pineapples, etc.....	3, 333. 84
(7) Establishment of testing and demonstration garden on Pima Indian Reservation; culture of cotton, fruit, and vegetables on reservations in the southwest with a view to finding profitable crops for the Indians to grow for themselves; to familiarize them with the work for the purpose of utilizing Indian labor, and to encourage agricultural industry among them.....	3, 648. 54
(8) Miscellaneous life history investigations, including a study of truffle culture and a study of the life history of the truffle fungus and truffle oaks; to bring about the establishment of truffle culture on a commercial basis in the United States; an investigation of the application of electricity to plant culture, to determine by field tests whether electricity can be applied with advantage in truck farming; an investigation of the stimulation treatment of crops; to discover the causes of increased yields of plants sprayed with Bordeaux mixture and of cereals treated to prevent smut; and a study of the life history of citrus fruits, with special reference to hardy and extra-early sorts and the growing of hardy stocks on which to graft them.	1, 638. 70

(D) *Bionomic investigations of tropical and subtropical plants.*

Outline of work:

(1) Cotton investigations: To secure productive varieties of cotton that resist the attack of the boll weevil; to ascertain the methods of cultivation best adapted to resist the boll weevil; to extend cotton culture in the drier regions outside the range of the boll weevil infestation; knowledge of varieties of cotton best adapted to given localities, and better methods of testing varieties....	\$13,345.00	✓
(2) Corn investigations: It is hoped to extend the culture of corn into regions of the South and West, where the crop is not now successful, by the acclimatization of varieties having special characteristics which adapt them to peculiar conditions of soil and climate and to resist insect enemies.....	4,300.00	
(3) Physiology of reproduction: Make applications of evolution to agricultural problems, such as (a) the effects of methods of propagation upon the vitality of cultivated plants, (b) the relative values of broad breeding, line breeding, and vegetative propagation, (c) the physiological effects of uniformity and diversity in descent, and (d) the relation of normal heredity to acclimatization phenomena.....	1,200.00	
(4) Rubber investigations: Study of rubber-containing plants suitable for culture in the United States.....	700.00	
(5) Coffee, cacao, and bananas: Advising correspondents, and completion of reports of previous studies.....	300.00

PROJECTS.

The principal projects conducted by the Bureau of Soils during the fiscal year ended June 30, 1909, were as follows, with approximate cost in each case. The cost of these projects has also been charged in each case against the group to which it pertains.

SOIL INVESTIGATIONS, 1909, \$200,000.

The various projects carried on by the Bureau of Soils during the fiscal year 1909 were as follows:

(1) *Soil Survey*.—This work comprises the surveying, both upon a detailed and reconnaissance basis, the mapping, and the classifying of the soils of important areas in various parts of the country, the preparing of reports containing descriptive matter relating to the different soils, their character, origin, and value for crops, and to the agricultural conditions found in each area surveyed. The maps show the distribution of the different soils, and the reports accompanying the maps describe these soils.

(2) *Laboratory investigations*.—This work has for its object the chemical and physical analyses of soils to determine their texture and to aid in determining the type; the investigation of the physical and chemical properties of soils which influence crop production.

(3) *Soil fertility investigations*.—This work has for its object the investigations of the causes of, and remedy for, infertility in certain soils and of the low crop yields arising in many soils from improper methods of cultivation and cropping.

(4) *Soil erosion*.—This work has for its object the investigation of the extent of damage arising from the erosion of cultivated soils, and the most practical remedial measures for checking the same.

Authority (Digest of Appropriations, p. 261): Soil Investigations: * * * Investigations of the relation of soils to climate and organic life; for the investigation of the texture and composition of soils in the field and laboratory; for the investigation of the cause and prevention of the rise of alkali in the soils of the irrigated districts; the investigations of soils and for indicating upon maps or plats, by coloring or otherwise, the results of such investigations; to map the tobacco soils of the United States; to investigate the soils and conditions of tobacco growth in Cuba, Sumatra, and other tobacco-competing countries; to investigate, with the view of improving, the conditions relating to the supply and sale of domestic tobacco to any foreign country or countries where the business of buying and selling tobacco is conducted by the government; * * * for materials, * * * instruments, apparatus, * * * and supplies; * * * and for official traveling expenses, * * * and other necessary expenses. * * *

IRRIGATION INVESTIGATIONS.

On the use of water in irrigation and technical investigations.

Arid States (in general): Collection, collation, and preparation for publication of information relating to the preparation of land for irrigation; laying out and building farm ditches; construction of farm reservoirs; use of windmills for supplying water for irrigation; and the application of water to crops usually grown in these regions, such as alfalfa, potatoes, sugar beets, grains, etc.....	\$8, 475. 84
Arizona: Investigation and studies of irrigation practice and methods of preventing losses.....	1, 548. 95
California: Studies of canal linings; evaporation losses and their prevention; percolation losses and the adaption of methods to soils, together with methods and cost of preparing land for irrigation and applying water to different crops in the Imperial, Sacramento, and San Joaquin valleys and other sections; maintenance of instrument rating station and repair shop.....	6, 571. 51
Colorado: Comparison of results of irrigation of orchards under practice common to this section with Pacific coast methods to determine whether equally good results could be obtained with less water than was commonly used; experiments in the application of water to sugar beets by different methods, and comparison with the general practice in this section together with experiments with different degrees of cultivation after irrigation to determine the effect upon the quantity of water needed by the crops.....	1, 962. 58
Humid States (in general): Studies of irrigation practice throughout the humid sections of the eastern United States and experiments testing the utility of more economical methods.....	2, 728. 23
Idaho: Studies of methods of bringing new land into cultivation and the quantity of water required by such land. Determination of the effect of using different quantities of water applied by different methods; relation of the quantities of water and time of application to yield and quality of crop.....	2, 258. 54
Iowa: Comparison of yields from similar plats irrigated and unirrigated; irrigation of "water meadows" with sewage water, and irrigation of meadows with stream water.....	400. 00
Kansas: Study of methods of applying water in the Arkansas, Cimarron, and Republican valleys for the purpose of preventing losses and bringing about the most economical use, and in pumping water for experiments in winter irrigation.....	1, 486. 96
Louisiana, Texas, and Arkansas: Study of rice irrigation and the preparation of a report describing irrigation practice in rice growing.....	1, 315. 69
Minnesota: Experiments in irrigation in lake region of northern Minnesota where summer droughts prevail.....	119. 80
Montana: Experiments in orchard irrigation in the Bitter Root Valley in the vicinity of Bozeman to determine the effects of different methods of applying water in conserving moisture; to determine losses of water through evaporation, and efficiency of methods of preventing these losses.....	1, 153. 90
Nebraska: Study and report of canal organization and management and methods of applying water in the North Platte Valley to determine their influence upon the economical use of water, and preparation of a general report on irrigation in the State.....	723. 79
Nevada: Studies of the amount of water required for best results in growing grain, alfalfa, garden truck, and fruit; best methods of irrigation of orchards and alfalfa, and adaptation of methods to soils and crops.....	1, 000. 00
New Mexico: Determination of the evaporation from soils and percolation of water applied in irrigation together with a study of general irrigation practice through the territory.....	1, 576. 27
North Carolina: Determination of the best methods of applying water to truck crops in the eastern part of the State.....	601. 75
North Dakota: Determination of the evaporation from soils under different methods of application of water and cultivation.....	30. 85

Oregon: Investigations and experiments to determine the practicability of irrigation during the dry months throughout the Willamette Valley where the annual rainfall is very heavy but summer droughts are regular and prolonged; unirrigated crops of alfalfa, corn, potatoes, onions, and small vegetables were compared with like crops irrigated with water pumped for the purpose; experiments with alfalfa and clover were made to determine the possibility of restoring worn out wheat lands by drainage during the dry season, and further experiments with irrigated and unirrigated orchards were conducted.....	\$4, 128. 50
Texas: Studies of pumping, conveyance, and measurement of water to consumers, preparation of land for irrigation, and application of waters to crops in a section just brought under irrigation and populated by settlers from humid regions to whom advice was supplied.....	2, 836. 92
Utah: Study of organization to provide for equitable division of water among canal companies taking water from the same stream; determination of the quantities of water used in general practice; experiments to determine what quantities of water give the best results, and best manner of applying water and providing new settlers with needed advice..	1, 739. 75
Washington: Experiments in orchard irrigation and cooperation with local parties with a view to the improvement of methods, and use of smaller quantities of water together with determinations of losses by evaporation..	3, 992. 86
Wyoming: Investigation of, and experiments with, windmills and internal combustion engines to provide practical information in relation to wind records; the installation and operation of windmills; storage and transportation of waters by use of reservoirs, tanks, and pipes, and the use of alcohol, kerosene, and gasoline as fuel in pumping engines used in connection with irrigation.....	3, 349. 08
	<hr/> 48, 001. 77

On irrigation extension.

Stations have been established and equipped in the semiarid region to determine the practicability of irrigation in sections where it has not been practiced generally, where river water is not available, the work including studies of the possibilities and cost of securing water supply by pumping with windmills and different kinds of pumps and by storing storm waters; and studies of the methods of applying water in order to make the largest use of the small supply available.

Aid and advice to settlers.

Study of the conditions under which irrigation must be practiced in regions opening to settlement and practical aid and advice to settlers through demonstration, special bulletins, personal conference, public addresses and correspondence. (Cost included in Arid States.)

DRAINAGE INVESTIGATIONS.

Arkansas: Ascertaining the value of wet lands and outlining general plans for drainage improvements along Plumb Bayou; continuation of drainage surveys on low lands bordering the Mississippi River in the White and St. Francis basins; determination of the feasibility and cost of construction of same; investigations of the practicability of draining the prairie lands south and west of Lonoke by means of roadside ditches, and improving the natural channels, especially in the area where the cultivation of rice is rapidly extending; tests of the effectiveness of under drains in preparing the land for crops other than rice; plans for the protection of the bottom lands along Village and Running Water creeks from overflow; and general improvement of malarial and unsanitary conditions.....	14, 823. 28
Atlantic Coast States (in general): Investigation to determine the value of tidal marshes for agricultural purposes; best methods of reclaiming, including best system of diking and methods of building, getting rid of interior seepage water and bringing soil into a condition fit for agriculture. (See also Delaware and Maryland.).....	652. 38

California: Development of plans for the organized drainage of lands in the Fresno and Turlock districts where both pumping and gravity drainage is required.....	\$1, 045. 91
Colorado: Investigations and surveys to determine the best methods of draining lands in the San Luis Valley where seepage and alkali are making rapid inroads upon the cultivated area as well as preventing the extension of settlement of adjoining unimproved land; study of the feasibility of reclaiming the injured lands, now estimated as amounting to 40,000 acres, in this valley, and to inaugurate similar studies in the Gunnison and Grand valleys including a topographic drainage survey of the California Mesa.....	5, 064. 45
Delaware and Maryland: Field surveys to determine methods best adapted for the drainage and reclamation of the swamp and overflowed river bottom lands of the flat coastal plain region and its adaptation for agricultural uses after drainage.....	1, 362. 96
Florida: Completion of investigations to determine the feasibility of draining the Everglades and the practicability of rendering portions of this swamp area available for the raising of citrus and other subtropical fruits; preparation of a proposed plan of drainage and suggestions as to best methods of undertaking the work.....	779. 03
Georgia: Survey and preparation of plans for drainage of the Berry School farm in Floyd County and for the protection of the lands in Jackson County by improving the Mulberry River by means of cut-offs and channel clearing.....	1, 131. 21
Illinois: Studies and surveys to determine the best plans for preventing injury by overflow along the Little Wabash River and other small streams in the southern portion of the State, and freeing them of surplus rainfall in order that they may be used for agriculture; collection of information regarding the size of ditches in operation ten years or more, the areas drained by them, efficiency as tested by experience, measurements of flow; observations of general conditions, rainfall and run-off data for use in determining the proper size of drainage ditches and drain-tile mains for lands of the type prevailing in the corn belt.....	3, 311. 41
Indiana: Report and plans for a freer and more complete drainage of lands in the valley of the Yellow River.....	6. 00
Louisiana: Collection of information relating to current construction of drainage ditches, conditions affecting their maintenance and repair; customary methods of carrying on the work and its cost; observations, measurements, etc., for use in computing the run-off from drainage areas.....	1, 478. 47
Mississippi: Completion of reports of work already accomplished in this State and drainage survey preliminary to report on and plan for the improvement of the Tuscumbia River to prevent overflow of bottom lands in Alcorn and Prentiss counties.....	3, 223. 36
Nebraska: Field survey and allied investigations to determine the best plan for protecting from overflow and for drainage of about 80,000 acres of bottom land along the Logan River where the valley is from $\frac{3}{4}$ to $1\frac{1}{2}$ miles wide, and the land, though very valuable for cropping, is now overflowed and nearly useless; survey of Silver Creek from its source to its junction with the Platte to determine location for an improved channel, cost of needed work, and extent of areas which should be benefited by such improvements; survey of Salt Creek from its junction with the Platte to a few miles above Lincoln to determine best method, cost, etc., of improving the channel to prevent the disastrous overflow of Lincoln and the rich bottom lands along the river; survey of Wahoo Creek to plan the improvement of the channel to prevent the overflow of the bottom lands; preliminary examination of the Nemaha River.....	6, 226. 57
North Carolina: Field survey and plans for the drainage of about 13,000 acres, known as "Angola" Bay Swamp, together with preparation of plans for the construction of about 22 miles of ditches and aid, and initiation of a comprehensive and adequate system of drainage; survey of and plans for the drainage of Lake Motamuskeet and the surrounding district, determination of elevation of Lake Phelps, Hongo Lake, New Lake, and Alligator Lake to obtain information needed in the preparation of complete plans for drainage and division into natural drainage districts of this section; survey and plans for the control of Lake Phelps and the drainage of the surrounding district; survey and completion of plans for main	

drainage of about 15,000 acres lying south of Moyock; survey and plans for proposed drainage of Cape Fear River low lands in vicinity of Kelly's Cove; survey and plans for a drainage system for the cultivated lands about Chadbourne; survey and completion of plans for drainage of about 15,000 acres, partly in swamp, along Pantego Creek.....	\$6,699.21
North Dakota: Observations and records of 28 soil wells to determine the effectiveness of tile drainage in a section where the ground freezes to a depth of about 6 feet during the winter.....	25.00
Oklahoma: Drainage survey and plans for the proposed improvement of the Dry Fork and Deep Fork rivers by means of straightening, channel cleaning, etc., to protect agricultural bottom lands from overflow.....	1,268.11
South Carolina: Drainage survey and preparation of plans for the improvement of natural channels to provide adequate drainage outlets in Berkeley County; for the location of natural drainage channels for an area 5 by 6 miles bordering the upper part of Sampit Creek and its tributaries; for the drainage of the low lands bordering thereon; field survey of section along the north side of Congaree River, Richland County, to determine best methods to be adopted for the protection of fertile bottom lands which overflow at time of freshets in the river, and fitting such lands for the most profitable cultivation; preparation of plans to utilize as far as possible the remains of levees constructed many years ago; collection of all available data as to frequency, duration, and height of freshets in the Congaree River, and nature of watershed from which the river is supplied.....	1,174.30
South Dakota: Field survey in Turner and Clay counties and preparation of plans for protecting from overflow and draining the bottom lands along the Vermilion River where the valley varies from $\frac{1}{2}$ to 3 miles in width; report on construction of Clay Creek ditch following drainage plan prepared by this office.....	1,998.35
Texas: Determination of the effect that different depths and locations of ditches have in relieving soil in which large crops of rice were grown the first year under irrigation, but which has since accumulated salt to such an extent that it has become unproductive; devising methods of drainage by means of which this land may be relieved; aid to ranch owners in planning drainage systems for ranches in Brownsville section.....	889.05
Utah: Continuation of experiments and investigations to determine the possibility and profitableness of draining and reclaiming areas of land once under profitable cultivation by irrigation, and subsequently ruined by the accumulation of water and alkali; experiments to determine the most practical materials available for use in constructing underdrains suitable for installing in the various soils found in different counties throughout the State; report completed on the drainage of irrigated lands covering Utah work to date.....	4,702.85
Wyoming: Completion of report on experimental drainage system at the Wyoming Agricultural Experiment Station farm at Laramie.....	10.00
Advisory and consulting drainage work: Examination, upon request of engineers and drainage boards, of proposed drainage plans and advisory reports upon the same; consultation with state committees upon drainage policies, and laws and feasibility of large drainage improvements, plans for which are in the hands of special local engineers, together with—	
Special scientific investigations: Relating to run-off to be provided for in different climates and different kinds of lands; effect of underdrains of different kinds and in different soils upon the water content; of the use of cement drain tile; lectures, addresses and written articles for the dissemination of popular information upon the subject.....	6,667.79
